General description

Management, Coordination and Supervision of Real Estate Developments.

Technical, administrative and financial expertise and proficiency are the basis for the accurate planning of any real estate undertaking, its conception, the execution and management of multiple contracts, the supervision of the works, and vital to ensure the adequate accomplishment of the works and equipment, to accompany the early stages of commercial development and to trigger guarantees and liabilities.

We believe it is paramount that the real estate developer is supported by experienced and knowledgeable professionals, Therefore, we have created a company for the Management and Supervision of major real estate developments, which comprises a team of multidisciplinary consultants.

This is the expertise of FFC, a real estate consultancy and management company, incorporated in July 1992 to further and broaden the activity of its founding and major shareholder, who has committed his name and know-how in the field of real estate to this project.
